

# Radar Subsystem Power Distribution Unit

# Radar Subsystem Power Distribution Unit

Input Voltage Range	AC Input Frequency Range	Number of Switched Outputs	Rated Installed Power
176–265 VAC 18–36 VDC	47–63 Hz	18	28 kVA (AC) 3,4 kW (DC)

Unit; specially designed for radio link systems. The designed power distribution unit supplies the power it receives from five different sources to both alternating current and direct current outputs. The power distribution unit is qualified in the relevant military standards for land platforms and is suitable for in-vehicle/shelter use. It can transfer system information and in-circuit test results to the user via its LCD screen.

## Input Features

● <b>Input Voltage</b>	230 VAC/50 Hz 1-phase 400 VAC/50 Hz 3-phase Battery: 28 VDC rated Battery Charging Unit: 28 VDC rated Alternator: 28 VDC rated
● <b>Input Voltage Range</b>	AC Inputs: 176–265 VAC phase-neutral DC Inputs: 18–36 VDC
● <b>AC Input Voltage Frequency Range</b>	45–55 Hz
● <b>No-load Power Consumption</b>	<2,5 A

## Output Features

● <b>Number of AC Outputs Switched</b>	12
● <b>Number of DC Outputs Switched</b>	6
● <b>AC Input Installed Power</b>	40 A/3-phase 20 A/1-phase (UPS)
● <b>DC Input Installed Power</b>	120 A

## Mechanical Properties

● <b>Width</b>	462±1 mm
● <b>Height</b>	102±1 mm
● <b>Depth</b>	505±1 mm
● <b>Weight</b>	17±0,2 kg

## Electromagnetic Compatibility

● <b>MIL-STD-461G</b>	CE102 CS101, CS114, CS115, CS116 RE102 RS103
-----------------------	---

## Environmental Characteristics

● <b>Operating Temperature</b>	MIL-STD-810G -32°C ~ +55°C
● <b>Storage Temperature</b>	MIL-STD-810G -40°C ~ +70°C
● <b>Solar Radiation</b>	MIL-STD-810G, A2 Climatic Zone
● <b>Mechanical Shock</b>	MIL-STD-810G, Method 516.6 Shock, Procedure I, Functional Shock, 40 g 11 ms
● <b>Vibration</b>	MIL-STD-810G, Category 8, Military Ground Vehicles
● <b>Altitude</b>	MIL-STD-810G, at 3.000 m altitude
● <b>Humidity</b>	MIL-STD-810G, %95 humidity (Without condensation)
● <b>Dust</b>	MIL-STD-810G Method 510.5 Procedure I, Tossing Dust

## Protection

● <b>AC input high voltage protection</b>	Closes the AC outputs.
● <b>AC input low voltage protection</b>	Closes the AC outputs.
● <b>DC input high voltage protection</b>	Closes the DC outputs.
● <b>DC input low voltage protection</b>	Closes the DC outputs.
● <b>Unit over-temperature protection</b>	Gives warning.
● <b>Battery reverse connection protection</b>	The DC outputs do not supply from the battery.
